

WEALTH CREATION

There are so many myths, schools of thought and viewpoints concerning finances, wealth, prosperity and wealth creation.

All these are vital and have role to play in a persons life. There are varied views on these themes and below is a very summarised view points in quote which can aide you in knowing more and pointing you towards that path of wellness within your finances.

The key is for you to become a better manager of your finances and also step out of the status quo concerning wealth being "a thing for the few".

1 WEALTH CREATION BEGINS WITH YOU

Someone will say, “I don’t
know anything”

It must begin with you starting that journey of searching.

2 START WITH WHAT YOU HAVE

There is always something about you, which you know or love so much. This is always a clue. There is something that you can do without stressing too much.

There is something that gives you joy anytime you start talking about or working on, this can aid in you looking at what you have. There may be something you managed to do on your own but you don't seem to think it's anything significant but this things could be the door to your release, wealth and beginning of greater things.

Access what you have or what you can do, say, get involved in without stress and note that.

3 BUILD ON YOUR SKILLS, KNOWLEDGE & PASSION

This is something that most people ignore. Your passion is one of the greatest assets you have. You must get to be point where you can begin to make your passion work for you.

**Your passion is a door way to your uncommon dreams.
Your passion is your door way to the outside world.
Your passion is what connects you into a world where
your shyness disappears and the things you truly love
come to light.**

You must look at how to also turn that passion into wealth. You must consider how to turn your passion into business. You must review the methodology needed to turn your passion into money generating options.

Turn that passion of singing into writing songs for others or walking into a studio session. Turn that passion of art into beginning to create your own small exhibitions and viewings. Turn that ability to resolving matters into polishing that skill and becoming a mediator.

You can do something with the skill you have. It doesn't have to be limited to only your paid job. Those skills can be harnessed and used to develop yourself, your dreams, and make it a consultancy.

Why not pass some of your knowledge over to others to enhance their abilities whilst promoting your know-how and edge. Why not link up with other great minds and come up with something that can bring true support to the community.

An aerial photograph of a residential neighborhood. The image shows several houses with brown roofs, green lawns, and swimming pools. The pools are rectangular and blue, some with white lounge chairs around them. There are trees and a paved path visible. The overall scene is a typical suburban residential area.

4 MAP YOUR AUDIENCE AND MARKET

Look for who your target reach may be?

Who are your potential clients, audiences, listeners?

Which class of people or entities could be attracted to your skills, knowledge, idea, passion? Which group are prepared to sit and listen to you?

Who will be happy to welcome you for a presentation?

Who might want to know a little bit more about you, whom you may want to approach?

5 EXPLORE RESOURCES YOU NEED

Find out what is necessary to make what you know a reality.

Convert your passion into business, money, wealth.

Use refined sources to add value to what you have.

6 TAKE IT TO THE NEXT LEVEL

Go Local

Try Regional

Go Global

Explore how you will reach through the WWW (web), Social Media, Technology and its impact.

7 BECOME A HOUSEHOLD NAME

This requires time, planning, consistency and focused zeal.
